Application No.

Continuation of 2. NOTE: It is respectfully noted that Applicant's amendments to the claims are not merely immediate clarifications. Rather, Applicant's amendment to claim 8, by way of example, now recites that the adhesive force exists between the adhesive layer and the stretched norbornene-based resin film where previously the adhesive force had been between the optical compensating film and the adhesive layer. Previously, the claim may have been read to include the possibility of the adhesive force existing between the polarizing plate (comprising the compensating film) and the adhesive layer. Such changes to the claim language will require further search and consideration by the Examiner.
